DETAILED ACTION

Applicants' Appeal Brief has been noted. However, due to further search and consideration, prosecution has been reopened, and a new, non-final office action is set forth below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuda.

The seat frame is item 11, the three-dimensional net is item 20 (since there is thickness to the net, it is considered to be three-dimensional), the fastener is F1, F2, F3 as seen in Figs. 1 and 2, when the fastener is released, the skin material 19 (against which a back of a seat occupant presses) will cover the net when it is not rolled up and secured. Furthermore, the surface rigidity of the skin material will be higher when the fastener connects the portion of the skin material to the three dimensional net than when the fastener is disconnected.

Allowable Subject Matter

Art Unit: 3636

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Smith teaches a device similar to that of the instant invention.
